Continuing Education Committee
Accredited Approver Unit
Policy Manual**

Overall Goals of the Committee

January, 2007

Reviewed, January, 2009

Specific goals will be developed on an annual basis and support the ongoing efforts of the committee.

To insure that the philosophy and beliefs of this committee are supported by the committee's activities, the following are our overall goals:

To insure that our responsibilities as an ANCC Accredited Approver Unit are met thus insuring that the quality of continuing nursing education (CNE) offered by an ANCC/MARN approved provider unit or a provider of an individual activity consistently meets the criteria set forth by the ANCC.

To insure that there is an appropriate number of qualified members of the CEC/AU and peer review groups to meet our goals and to support our philosophy and beliefs.

To provide providers and/or potential providers of CNE with updated, clear information to assist them with understanding, implementing and monitoring ANCC Criteria through the written medium, individual consultation and periodic educational forums.

To create, implement and monitor an evaluation plan to consistently evaluate in an ongoing manner, our own goals and activities via the evaluation/outcomes process.

To evaluate the efforts of our approved provider units and the providers of approved individual CNE activities through a peer review/quality assurance process.
